

FACT's 4 distinct features: fast recognition speed, highly accurate recognition rate, convenient usage, and trusted privacy protection. Its product design is compact and cost-effective, and offers intuitive management.

Background

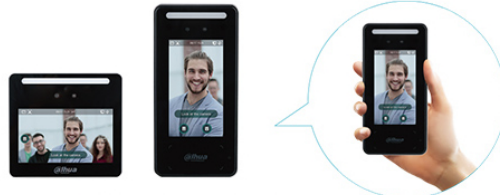

The FACT series is one of the most suitable and ideal access control products for the post Covid-19 world.

- Reduces contact: it is touchless and doesn't require additional actions
- Keeps social distance: it covers a recognition distance of up to 1.5 meters
- Avoids crowding: it offers recognition of less than 0.3 second per person

FACT Features

• Compact Design

The size of the FACT device is similar to an iPhone 12 Pro Max. It reduces installation costs and allows installation of face recognition in small spaces.

108mm×116mm(H) 87.5mm×174mm(H)

• 4-in-1 Design

Buying this equipment is like purchasing 4 devices: 1 access control, 1 time Attendance, 1 door station, and 1 IP camera.

- 01 Access Control**
Supports Face Recognition to unlock the door.
- 02 Time Attendance**
Supports Face Recognition for clocking in and out.
- 03 Intercom**
Supports video call function to contact the reception, and allows unlocking of door/gate from the indoor monitor.
- 04 IP Camera**
Supports real-time streaming and capturing of targets.

• Multiply Management Methods

Management

- Device configuration

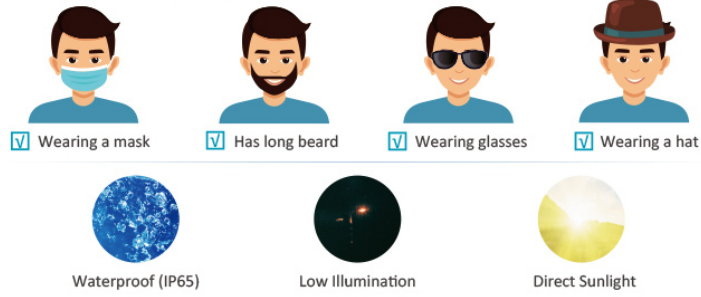

— DSS

- User management
- Device configuration

- User management
- Device configuration
- Remote unlocking
- Alarm push notification

• Self-developed Face Recognition Algorithm

FACT can adapt well to changes in body characteristics, accessories, or even harsh environments. Even if a person is wearing a mask, has long beard, wearing a hat or has glasses on, the device can still accurately detect human targets. It can also adapt in different weather conditions and environments with low illumination.

• Anti-spoofing Algorithm

Through the Anti-spoofing Algorithm, individuals that are using photos and videos to enter will be denied access to the property.

Integrated System Topology

Integrated Video Intercom

Allows visitors to call the reception via an AC terminal. The reception can answer and unlock the door from an indoor monitor.

Third Party Access Control System Cooperation

FACT ASI6 series supports to connect third party access controller system via wiegand output.
